Re: Middle Neck Road and East Shore Road Corridor Study
County: Nassau Town/City: North Hempstead

Dear Mr. Kennedy:

In response to your recent request, we have reviewed the New York Natural Heritage Program database with respect to the above project.

We have no records of rare or state-listed animals or plants, or significant natural communities at the project site.

Within 3/4 mile of the Middle Neck Road corridor is a documented nesting location for **bald eagle** (*Haliaeetus leucocephalus*, NYS-listed as Threatened). For information about any permit considerations for your project, please contact the Permits staff at the NYSDEC Region 3 Office at dep.r1@dec.ny.gov, (631) 444-0365.

For most sites, comprehensive field surveys have not been conducted. We cannot provide a definitive statement on the presence or absence of all rare or state-listed species or significant natural communities. Depending on the nature of the project and the conditions at the project site, further information from on-site surveys or other resources may be required to fully assess impacts on biological resources.

For information regarding other permits that may be required under state law for regulated areas or activities (e.g., regulated wetlands), please contact the NYS DEC Region 1 Office, Division of Environmental Permits, as described above.

Sincerely,

Nicholas Conrad
Information Resources Coordinator
New York Natural Heritage Program
